PROFESSIONAL SUMMARY

Results-driven software engineer with strong analytical skills and a passion for driving Automation and Process Mining excellence. A self-starter with a proven track record of delivering impactful solutions that streamline workflows, enhance efficiency, and solve complex problems. Skilled in delivering high-quality, production-ready solutions with minimal supervision, aligned to business objectives and innovation-driven strategies.

TECHNICAL SKILLS

- **Languages:** Python, Java, JavaScript, Go, Shell Scripting
- **Frontend:** React.js, Redux, Next.js, HTML, CSS
- **Backend:** Node.js, Express.js, FastAPI
- **Testing & Automation:** Jest, Cypress, Postman, Ansible, API Automation
- **DevOps & Cloud:** Docker, Kubernetes, GitHub Actions, Google Cloud Platform (GCP), Linux
- **Analytics & Data:** IBM SPSS, Tableau, Pandas, SQL
- **Other:** REST APIs, Data Structures & Algorithms, OOP, System Design

PROJECTS

ProcessFlowInsights – Workflow Automation:

[Repository](#)

React, Node.js, Ansible, Data Visualization, Ansible, Docker, Cypress (E2E)

- Engineered a responsive dashboard to map workflows, pinpoint bottlenecks, and provide process mining insights REST APIs for seamless integration.
- Automated deployments and validations using Ansible playbooks and Cypress E2E tests to ensure reliability across environments.

Outcome: Enhanced visibility into processes, slashing incident resolution time by ~25%.

Gemini Live — Real-time Voice AI Web App (GCP-ready):

[Repository](#)

Node.js, Express, WebSocket, Web Audio API, Google Gemini Live (GenAI), API Integration

- Built a low-latency, interruptible voice assistant demo using Google Gemini Live for speech-to-text and text-to-speech with client-side VAD and server WebSocket streams for real-time interactions.
 - Implemented API-driven server & efficient AudioWorklet-based PCM handling to minimize latency for concurrent users.
- Outcome:** Cloud-hosted, production-oriented demo reducing interaction lag by ~40% also demonstrates GCP integration and real-time API-driven UX.

EventTracker – Event Logging & Analytics Platform:

[Repository](#)

React, Redux, Node.js, JavaScript, Jest, Cypress, Python, SQLite, IBM Cloud

- Developed a full-stack app for capturing events, managing user auth with JWT, and displaying real-time analytics via interactive charts.
- Integrated unit tests with Jest, E2E flows with Cypress, and a Python script for offline data processing to maintain data integrity.

Outcome: Streamlined event tracking for teams, improving analysis efficiency by ~20% through automated insights.

AUTOMATION & DEVOPS HIGHLIGHTS

- Built CI/CD pipelines with GitHub Actions and Ansible to automate testing and deployments, accelerating release cycles by 30%.
- Leveraged Docker and Kubernetes for container orchestration, enabling scalable, fault-tolerant app rollouts on Linux systems.

EDUCATION

Bachelor of Engineering – Artificial Intelligence & Machine Learning (ISB&M , Pune)

Graduation Year: 2024 | CGPA: 8.14

Intermediate (ISC) – 82.0% | High School (ICSE) – 89.8%

RESEARCH & ACHIEVEMENTS

- **Research Publication:** Presented “AI-Driven Solutions for Driver Safety & Real-time Monitoring” at ICMETET 2024, recognized for proposing scalable architectures for hybrid cloud deployment.
- **Open-Source Contributions:** Built and published reusable utilities for logging, automation, and monitoring that improved developer productivity and were adopted by peers.
- **GitHub Portfolio:** Active contributor with cloud, automation, and test-focused projects; codebases and architecture diagrams demonstrate industry-ready practices.
- **Ownership & Delivery:** Consistently designed, coded, deployed, and optimized production-ready projects.
