Career Objective

Detail-oriented and analytical individual with a strong foundation in software development, system architecture, data structures, and algorithmic problem-solving.

Passionate about designing scalable, fault-tolerant software solutions in distributed environments. Eager to deliver impactful products by collaborating in agile teams and leveraging cutting-edge technologies to solve real-world challenges.

Projects

Driver Drowsiness Detection System:

Python, OpenCV, dlib, Haar Cascades, SMTP, SQLite

- Designed a computer vision solution to detect driver fatigue in real time using facial landmark detection.
- Emphasized modular code structure for scalability and low-latency prediction in real-time environments.
- Incorporated alert triggering using audio feedback on threshold breach.

Logs Guard-AI – Intelligent Log Monitoring:

Scikit-learn, Pandas, Ansible, Docker, Kubernetes

- Developed an AI-driven DevOps solution that ingests Linux server logs, applies ML models for anomaly detection, and forecasts potential failures.
- Containerized services with Docker and deployed on K8s clusters for fault-tolerant execution. Delivered predictive analytics for proactive system monitoring, aligning with real-world SRE and AIOps practices.

Screen Spy – Automated Screen Activity Logger:

Python, PyAutoGUI, OS, SQLite

- Built a background process to log screen activities and capture user behavior insights.
- Enabled timestamp-based logging for actionable data collection and trend analysis. Focused on resource efficiency and extensibility for future add-ons.

System Enhancement & Utilities

- Enabled automated screenshot emailing via SMTP for remote monitoring.
- Integrated timestamped folder creation for storing drowsiness event logs.
- Designed a simple HTML/CSS interface to launch the detection system.
- Focused on real-world utility through scripting, file handling, and automation.

Languages Known

- English | Hindi

Education

Bachelor of Engineering – Artificial Intelligence & Machine Learning

International School of Business and Media, Pune

Graduation Year: 2024 | CGPA: 8.14

Intermediate (ISC) – 82.0%

Dr. Virendra Swarup Education Centre, Awadhपुरi, Kanpur – 2019

High School (ICSE) – 89.8%

Dr. Virendra Swarup Education Centre, Awadhपुरi, Kanpur – 2017

Technical Skills

- Languages:** Python, Java, JavaScript, C++ (Basics)
- CS Fundamentals:** Data Structures and Algorithms, OOP, System Design, Operating Systems, DBMS, Computer Networks
- Web & Backend:** React.js, Node.js, Express.js, MongoDB
- Machine Learning Tools:** NumPy, Pandas, Scikit-learn, OpenCV
- Problem Solving:** Time & Space Complexity Analysis, Debugging, Algorithm Optimization, Agile Methodologies
- Dev Tools:** VS Code, IntelliJ IDEA, Git, GitHub
- Soft Skills:** Independent Problem Solving, Handling Ambiguity, Execution Excellence, Team Collaboration, Fast Learner, Time Management

Research & Innovation

Research Paper Presented

“AI-Driven Solutions for Driver Safety & Real-time Monitoring”

International Conference on Multidisciplinary Emerging Trends in Engineering and Technology (ICMETET), 2024

- Showcased innovative application of AI in public safety systems. Covered scalability, architecture, and social implications of real-time systems.
- Discussed architectural design, real-world use cases, and social implications.

Additional Information

- Actively maintains [GitHub](#) with real-world projects.
- Committed to continuous learning and team-driven impact.
- Familiar with agile development cycles and fast-paced delivery.
- Available for immediate joining.
- Open to relocation.
