Career Objective

Detail-oriented and analytical professional with a strong foundation in software development, functional testing, and system troubleshooting.

Passionate about resolving issues in critical business systems through rigorous test planning, defect tracking, and collaborative problem-solving. Eager to contribute to agile teams by delivering high-quality, reliable software solutions in fast-paced environments.

Projects

Driver Drowsiness Detection System:

Python, OpenCV, dlib, Haar Cascades, SMTP, SQLite
• Created a real-time fatigue detection system, with *test case execution* to ensure low-latency accuracy. Logged defects in JIRA and documented *troubleshooting guides* for reliable alert integration.

Logs Guard-AI – Intelligent Log Monitoring:

Scikit-learn, Pandas, Ansible, Docker, Kubernetes
• Built an AI tool for server log analysis, with *functional testing* to validate anomaly detection. Performed *defect tracking* and documented *root cause analysis* for automated fixes via Ansible.

Screen Spy – Automated Screen Activity Logger:

Python, PyAutoGUI, OS, SQLite
• Developed a lightweight logger with *test case design* to ensure accurate activity tracking. Tracked defects using Bugzilla, documenting *troubleshooting steps* for efficiency.

Gemini Live App – Real-Time Voice AI Web App

Google Gemini Live API, Node.js, JavaScript
• Developed a voice AI app with *real-time speech processing*, validated through *functional test planning*. Tracked API defects using Bugzilla, documenting *troubleshooting steps* for stable performance.

System Enhancement & Utilities

- Enabled automated screenshot emailing via SMTP for remote monitoring.
- Integrated timestamped folder creation for storing drowsiness event logs.
- Designed a simple HTML/CSS interface to launch the detection system.
- Focused on real-world utility through scripting, file handling, and automation.

Languages Known

- English | • Hindi

Education

Bachelor of Engineering – Artificial Intelligence & Machine Learning
International School of Business and Media, Pune
Graduation Year: 2024 | CGPA: 8.14

Intermediate (ISC) – 82.0%
Dr. Virendra Swarup Education Centre, Awadhपुरi, Kanpur – 2019

High School (ICSE) – 89.8%
Dr. Virendra Swarup Education Centre, Awadhपुरi, Kanpur – 2017

Technical Skills

- **Languages:** Python, Java, JavaScript, C++ (Basics)
- **CS Fundamentals:** Data Structures and Algorithms, OOP, System Design, Operating Systems, DBMS, Computer Networks
- **Web & Backend:** React.js, Node.js, Express.js, MongoDB
- **Machine Learning Tools:** NumPy, Pandas, Scikit-learn, OpenCV
- **Problem Solving:** Time & Space Complexity Analysis, Debugging, Algorithm Optimization, Agile Methodologies, Functional Test Planning
- **Dev Tools:** VS Code, IntelliJ IDEA, Git, GitHub
- **Soft Skills:** Independent Problem Solving, Handling Ambiguity, Execution Excellence, Team Collaboration, Fast Learner, Time Management

Research & Innovation

Research Paper Presented
“AI-Driven Solutions for Driver Safety & Real-time Monitoring”
International Conference on Multidisciplinary Emerging Trends in Engineering and Technology (ICMETET), 2024
• Showcased innovative application of AI in public safety systems. Covered scalability, architecture, and social implications of real-time systems.
• Discussed architectural design, real-world use cases, and social implications.

Additional Information

- Actively maintains [GitHub](#) with real-world projects.
- Committed to continuous learning and team-driven impact.
- Familiar with agile development cycles and fast-paced delivery.
- Available for immediate joining.
- Open to relocation.
